The Indonesian government has approved a mining license for Tambang Mas in Sangihe Island, which has raised concerns about the impact on the island's ecology and the rights of local communities. Tambang Mas Sangihe holds a sixth generation working contract with the Indonesian government, which was initially made in 1997. The company processed that license in steps, after obtaining environmental clearance from the provincial government of North Sulawesi. Tambang Mas Mine Manager Bob Priyo Husodo explained that the ministry of energy issued approval of TMS' operational activity after approving their related to environmental study licensing.

Tambang Mas, said Bob, processed that license in steps, after obtaining environmental clearance from the provincial government of North Sulawesi. He Tambang Mas Mine Manager Bob Priyo Husodo explained that the ministry of energy issued approval of TMS' operational activity after approving their related to environmental study licensing. Todotua was with Tambang Mas for a year and a half. "I don't want to comment much because for the past 10

citizen has the same rights in business. He said that since joining the company in 2019 he has bridged a lot of the communication with the government Todotua denied any connection between the ease of licensing for Tambang Mas with his activity as a volunteer for Jokowi. According to him, every Todotua denied any connection between the ease of licensing for Tambang Mas with his activity as a volunteer for Jokowi. According to him, every

On the website of Gold Corporations, a company affiliated with Sangihe Gold Corporation, Todotua is listed as a Director for Government Relations. Todotua is listed as a Director for Government Relations. volunteers for Joko Widodo in the 2019 presidential election.

He suspects that the process to obtain an operational license went smoothly for Tambang Mas due to the involvement of people in the circle of supporters unstable, earthquakes, landslides, and flash flooding disasters often occur," said Merah.

According to company records, Sangihe Island has indicated gold resource of 3.16 million tons containing 1.13 grams of gold per ton and 19.4 grams of to him, authorization for large-scale gold exploitation on Sangihe Island is just the government's way to make things easier for foreign investment.
